Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8,27,29,32,33,34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Storm '130.

Storm is considered to render obvious all of the subject matter of the above claims. Specifically, Storm teaches a flexible bag 98 (as shown in figure 15) and an electrode 101, as well as a terminal 102. The bag contains fluid that circulates from inlet 99 to outlet 100. The bag 98 of Storm is considered to be obvious over the fluid containing layer of applicant's claims since both structures accomplish an analogous function, namely circulating thermal exchange fluid. Regarding the subject matter of claim 7, the electrode of Storm can function as any type of electrode mentioned. Still further, regarding claim 8, to have a plurality of electrodes instead of just one is deemed to have been obvious in light of the lack of criticality for such in applicant's specification, and the fact that the device of Storm would function substantially the same if it had multiple electrodes.

3. Claims 9-26,30,31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Storm '130 as applied to claim 1 above, and further in view of Nielsen et al '558.

Nielsen teaches the use of an adhesive surface for use with a variety of biomedical electrodes. To use such adhesive with the device of Storm would have been considered obvious since such allows for the secure placement of electrodes onto the patient's body without burning of the patient's tissue.

Allowable Subject Matter

4. Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (703) 308-2997. The examiner can normally be reached on M-F, 9-5.
